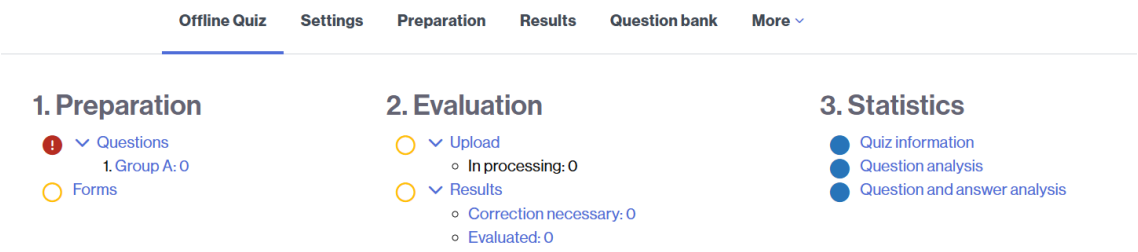
Campus Virtual de la UAB

UAB

When you access an offline Quiz activity, you will find a panel indicating the three phases of the activity (those that take place in the virtual classroom).

For each phase, you will see what actions you can perform and their status: which ones are completed, which ones require your attention (or are expected to be completed in the future).



1. PREPARATION

- **Questions**. In the **Questions** section, you can select questions from the classroom **Question bank** and assign them in the exam.

  The number of exam variations you have configured (Groups) is displayed, and you can assign questions to each template - either the same questions in a different order, or either different questions altogether.

- **Forms**. In **Forms** you can preview the exam (and make modifications if needed).

  You can also generate (and download) the documents associated with the exam:

  - **Question form** (template document with the questions and the given answer choices).
  - **Answer form** (template where the student will mark his/her answers).
  - **Correction form** (exam questions indicating which answer(s) are corrected in each case).

2. EVALUATION

- **Upload**. In the **Upload** section, you will upload a .zip file containing all the scanned student answer sheets.

You will also see the status of the upload process.

- **Results**. In the **Results** section, you can see how many exams were automatically graded without error and how many returned some type of error (NIU reading error, incorrect answers, or errors in the scanned document's reference marks).

  If you encounter an error, you can correct it in this section.

3. STATISTICS

- **Quiz information**.
- **Question analysis**.
- **Question and answer analysis**.

At any time, you can see which phases or actions have been completed and which require your attention. An informative legend is provided below the activity overview for your convenience.
